Ok, thanks! Feel better!

Attached is the OPPT review that was done – it might make it easier for you to just add to it.

Hoping I can give you something tomorrow.

I did start looking it over.

I had physical therapy today and I am feeling a little sore and want to head home.

Bill,

We have all the OPPT stuff handled since Laura herself is the OPPT lead for POPs, but if you could provide thoughts on the adverse effects by COB Monday, that'd be great?

Thanks,
Karissa

Howdy Laura,

What is your timeframe for turnaround? Also, since this is a flame retardant, has anyone in OPPT been review?

Thanks!

Subject: Request for assistance - Stockholm Convention listing proposal

Hi Bill and Karen,

I was wondering if you might have some time to take a look at the attached proposal submitted by Norway to list the chemical Dechlorane Plus under the Stockholm Convention. The Convention has screening criteria for proposals, also attached,

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

(e) Adverse effects:

- i) Evidence of adverse effects to human health or to the environment that justifies consideration of the chemical within the scope of this Convention; or
- ii) Toxicity or ecotoxicity data that indicate the potential for damage to human health or to the environment.

Ex. 5 Deliberative Process (DP)

I thought that since the proposal discusses endocrine disruption potential, you might want to provide some input on that information, but any thoughts you have on the rest of the adverse effects section and even on the rest of the proposal would be most welcome!

Thank you,
Laura
